NEXT GEN BUILDATHON

CHAPTER- 2

- **TEAM ID :** (Team ID's will be sent to team leader’s email).
- **TEAM NAME :** (Mention the name exactly as registered on the website).
- **DOMAIN**: (Domain number and full name has to be mentioned exactly as Present in website).
- **FOCUS AREA:** (Mention the focus area related to the domain chosen in few words).
- **PROBLEM STATEMENT**: (State the problem statement in 1 - 2 sentence).
- **BUILD TYPE**: (Hardware / Software / Hybrid of Both).

VVCE

TEAM NAME

THE PROBLEM

NEXTGEN BUILD-A-THON

- Clearly define the problem and describe the situation or challenge in specific terms.
- Identify the people, groups, or stakeholders who experience the Problem most directly. Briefly explain the key causes behind the problem..
- Support the problem with your own research, such as surveys, interviews, field visits, Or Obsevation along with relevant source and the year .
- Mention existing solutions and their limitations, then clearly identify the specific gap that remains unresolved.

VVCE

TEAM NAME

THE IDEA SOLUTION

NEXTGEN BUILD-A-THON

- Present your solution using bullet points, images, flowcharts, diagrams, or other simple visuals.
- Explain clearly how your solution works and how it solves the identified problem
- Highlight the key features or aspects that make your solution different from existing solutions.
- Explain why this approach is suitable and what makes it practical with today’s technology.

VVCE

TEAM NAME

TECHNICAL APPROACH

NEXTGEN BUILD-A-THON

- Show a clear diagram of the solution, such as an architecture diagram, block diagram, flowchart, or flow diagram.
- Explain how the system works step by step using concise points or a format of your choice.
- Mention the key technologies used, including programming languages, frameworks, AI models, hardware, sensors, or platforms.
- Specify the datasets, data sources, or other inputs used by the solution.

VVCE

TEAM NAME

PROTOTYPE & FEASIBILITY

NEXTGEN BUILD-A-THON

- State the current stage of your prototype — whether you are at the idea, design, partial development, or working stage.
- Prototype Demo (Optional): Add a screenshot, photo, demo link, or your own built prototype, with a brief note explaining what it demonstrates.
- Explain the feasibility of your solution in terms of technology, cost, development time, required skills, and practical use.
- Mention few key challenges or risks and briefly explain how your team plans to address them.

VVCE

TEAM NAME

IMPACT & SCALABILITY

NEXTGEN BUILD-A-THON

- Identify who benefits, how many people are affected, and the social, environmental, or economic value created.
- State the expected measurable outcomes, such as time saved, cost reduced, or resources protected
- Explain how the solution can scale to more users, locations, or sectors and what it needs to scale.
- Explain how the solution can remain operational over time, including upkeep and continued user adoption.
- **Next Step**: What the team plans to build next in one sentence.

RULES AND REGULATIONS

PART ONE

NOTE: You can delete the slides (Important pointers) when you upload the final PPT .

- Submit only one PPT per team. The maximum slide limit is six(6), including the first slide.
- Your Team ID and Secret Code will be shared with the registered team leader through email. Keep them confidential and enter them correctly wherever required. Do not share the Secret Code, as anyone with access may be able to modify or submit your team's PPT..
- Use the same team name as registered. Do not mention your college name or members' names anywhere in the PPT.
- Keep the event header, college header, and logo exactly as provided. You may change the colours and overall theme of the slides. Ensure to keep the slide title as it is.
- Follow the given slide order and make sure every required point is covered.
- Use concise points, flowcharts, diagrams, and visuals wherever appropriate. Avoid large paragraphs and keep the presentation easy to understand at a glance.

RULES AND REGULATIONS

PART TWO

NOTE: You can delete the slides (Important pointers) when you upload the final PPT .

- Only 80 teams will be shortlisted across all five domains. Only shortlisted teams will be eligible to attend the offline hackathon.
- AI-generated content should not exceed 20% of the overall presentation. AI-generated content will significantly reduce your chances of being shortlisted.
- Support all claims, numbers, and statistics with credible sources, evidence, or clear explanations. Unsupported information may reduce your score.
- Clearly define a specific problem. Avoid problems that are too broad or generic, and do not present your product or solution as the problem.
- Use only your own prototype work in photos or demos. AI-generated or unrelated prototype images may reduce your score.

RULES AND REGULATIONS

PART THREE

NOTE: You can delete the slides (Important pointers) when you upload the final PPT .

- SUBMISSION HAS TO BE STRICTLY DONE IN PDF FORMAT ONLY. FILE NAME SHOULD BE SAVED AS TEAM ID , WHICH WILL BE SENT TO TEAM LEADER'S EMAIL. EX: 26NGB#####
- PPT submissions will open on 18 October at 1:00 PM and close on 20 October at 11:59 PM. (TENTATIVE DATES)
- Submissions, edits, updates, and resubmissions will be allowed only within this window.
- The submission portal will not accept submissions before the opening time or after the deadline. After the deadline, no resubmissions or corrections will be accepted.
- Teams are responsible for ensuring that their final submission, Team ID, and Secret Code are entered correctly.
